- Dutch (First Language)
- English (Advanced)

PROFILE

I'm Nigel Becholtz, an 18-year-old third-year Software Development student at Grafisch Lyceum Rotterdam. My main passion lies in back-end development, where I enjoy building the logic, structure, and systems that power applications behind the scenes.

I have experience with HTML5, CSS3, JavaScript, PHP, MySQL, and Node.js, and I regularly work with tools and frameworks such as Laravel and React. I also have experience hosting and managing multiple projects on a VPS, which has strengthened my understanding of deployment, server management, and database architecture.

JOB EXPERIENCE

OptimaSys, Marbella - Spain 09-2025 - Current
Service and Bar Employee

- Developed and maintained internal side-projects using Laravel, React, and MySQL
- Designed and implemented REST APIs for system integrations
- Built backend functionality and database structures for web applications
- Integrated external services including AI-based tools
- Collaborated remotely with an international development team
